

# P-9935Modbus Modbus Communication Card CE

## Description

For integrating fire alarm system to BMS, GST provide ModBus Interface Card P-9930ModBus for GST-IFP8 panel. Status of the fire alarm system will be converted and transferred to the memory of the interface card. The BMS system can simply read out the data and decode, to get all information required.

## Features

- 4 types of statuses for each initialization device, Normal \_ Fire \_ Fault \_ Disable
- 4 types of statuses for each output device, Normal \_ Action \_ Fault \_ Disable
- Separate zone status transmission, Normal \_ Fire

## Technical Specification

- Compatible Panel: GST-IFP8 panel
- Communication Protocol: RS232/USB
- Baud Rate: 2400
- Parity Check: none
- Stop Bit: 1 bit
- 10 bits for each byte
- Device Capacity: 120758 (499X242)
- Zone Capacity: 999
- WEEE & RoHS compliant

## Order Information

Part No.	P-9935Modbus
Device Name	Modbus Communication Card
Order Code	3671833
